

Federal Grid Company holds meeting with investment community

On 8 September 2015, management of Federal Grid Company met with representatives of major investment banks and investment companies in Moscow to present the financial results of the first six months of the year and also outline plans for the medium term.

At the business breakfast meeting, FGC UES representatives commented on factors affecting the Company's activities in the first half of the year, measures being undertaken to ensure financial stability, top business priorities, as well as planned updates to the investment program through 2020.

The company regularly holds meetings with the investment community. Following the publication of Federal Grid Company's IFRS results for the first half of 2015, the Company decided to host a meeting instead of holding a conference call, thereby facilitating direct dialogue and providing participants with the opportunity to discuss their questions directly with management.

"FGC UES is focused on ensuring maximum transparency and openness. Meeting with the investment community allows us to establish effective two-way communication and receive feedback from the market, which in turn assists management in developing optimal decisions going forward," commented Andrey Murov, Chairman of the Board of Federal Grid Company.
